Initial Thoughts

When somebody says “digital transformation” in education, what is your initial reaction?

Why EmpowerED?

THE CASE FOR CHANGE

**Improve
outcomes**

**Equity/
Inclusion**

Belonging

Future Readiness

Digital put parents in the classroom and teachers in the home.

THE CHALLENGE OF SCALE - Discussion

What are the greatest challenges we need to overcome?

Ped-tech, Not Ed-tech

Presented by OPTIMUS EDUCATION

Supported by Confederation of School Trusts

Windsor Academy Trust

Digital Innovation Award

Serving communities with deprivation significantly above the national average, Windsor's EmpowerED strategy is the engine of social mobility. By embedding digital accessibility as a non-negotiable student entitlement, they are closing the gap for their most vulnerable learners – proven by their 100% Good or Outstanding Ofsted ratings and recognition as a global Apple case study.

Windsor Academy Trust
West Midlands, United Kingdom

Accelerating academic improvement. With iPad.

Windsor Academy Trust (WAT) is a publicly funded group of schools in the West Midlands. It delivers education to 10,000 primary and secondary students from a range of socio-economic backgrounds – including many who live in the top 1% of the country's highest-need areas.

Since growing from just one institution to now 15, Windsor's mission has been to bolster underperforming schools and give all students access to technology and learning. As part of this goal, WAT deploys iPad to teachers and students – which school leaders say is helping to drive better academic results.

"Our academic outcomes have significantly improved across our schools in the time since we deployed iPad. That's no coincidence."

Dawn Haywood
CEO, Windsor Academy Trust
